

MIDI Razor Edits v0.1.0-beta.1

Creating new areas

Default action	Make a new area, deleting any old areas. In the piano roll, this is a free area (non-full-lane), in the CC lanes, it's a full-lane area Snapping preference of the user is respected.
⇧	Reverse snapping
⌘	Add new area (retain existing areas)
⌘	In the piano roll, make a full-lane area In the CC lanes, make a non-full-lane area
Double-click	Create a new area surrounding all events (in piano roll, a free area; in CC lanes, a full-lane area)
Alt+Double-click	In a CC lane, create a new free area surrounding all events.

I'm not on macOS, you jerk

⌘	Ctrl
⇧	Shift
⌘	Alt
^	"Super", the Windows key (sorry, you'll need to use a registry script or AHK or whatever it is you people do to make it useful for something other than opening that worthless menu).

Working with existing areas

Modifier	Behavior
Default action	Move areas with contents (note: velocity lanes can't move left/right)
⇧	Move areas with contents without snap
⌘	Copy areas with contents
⇧ + ⌘	Copy areas with contents without snap
⌘	Move areas with contents, preserving leading/trailing notes
⇧ + ⌘	Move areas with contents, preserving leading/trailing notes, without snap
⌘ + ⌘	Copy areas with contents, preserving leading/trailing notes
⇧ + ⌘ + ⌘	Copy areas with contents, preserving leading/trailing notes, without snap
^	Move single area with contents
⇧ + ^	Move single area with contents, without snap
⌘ + ^	Copy single area with contents
⇧ + ⌘ + ^	Copy single area with contents, without snap
⌘ + ^	Move single area with contents, preserving leading/trailing notes
⇧ + ⌘ + ^	Move single area with contents, preserving leading/trailing notes, without snap
⌘ + ⌘ + ^	Copy single area with contents, preserving leading/trailing notes, without snap
⇧ + ⌘ + ⌘ + ^	Ignore contents (single area)
⌘ + edge drag	Stretch contents. Notes cannot be stretched vertically, and Velocity/Release Velocity cannot be stretched horizontally. Otherwise, go wild.
Double-click	Open The Widget©™

Actions

W	Enter/exit "widget mode"	Enter only works when hovered. Exit anywhere. Widget currently only exists for CC lanes.		Most key commands will work in single-area mode if you hold ⇧ + ⌘ (alt + shift) while hovering
C	Toggle note area -> CC area span			
D	Duplicate contents (move area)			
F	Make area -> full lane area			
S	Select contents			
U	Unselect contents			
V	Invert contents			
X	Delete contents			
⌘ + ⌘ + ^ + X	Delete areas (leave contents)			
Ctrl + Alt + F10	Show the compositing debug dialog	Windows only, help me help you to enjoy this script in its intended glory on Windows.	0, 0, 1 disables the compositing delay entirely.	
Delete	Delete areas + contents	If hovered, just the hovered area. Otherwise all. opt+delete works like X		
Escape	Exit script
